RE: MB Docket No. 10-56

Dear Chairman Genachowski and Commissioners,

The South Jersey Field of Dreams operates a recreational facility and baseball league for physically and mentally challenged children in Southern New Jersey using regional resources and local volunteers. Through the support of the City of Absecon and many other organizations the South Jersey Field of Dreams is able to provide a complex where over 200 special players from thirty-three towns and six counties in southern New Jersey have their very own "field". Comcast is one such organization that has helped us tremendously in both with monetary support as well as "hands on" support.

In recognition of Comcast's financial and unexcelled volunteer support, a picnic site at the Field of Dreams has been aptly named "The Comcast Courtyard". This is a handicapped accessible picnic area, adjacent to the ball field, where parents and children can enjoy while cheering on their teams. Comcast is a true partner of the South Jersey Field of Dreams, they have proven to be in for the long run as we have recently celebrated our fourth Comcast Cares Day and we look forward to many years in the future. During those four years I had the privilege of working side by side of some the most caring volunteers imaginable. An average of 50 - 80 volunteers showing up to do manual labor, so that our special players will have a special place that is truly their own. I've also witnessed these same volunteers taking to the "field" and being an individual coach for each of our players. Truly a team effort and one that I am proud to call a "Dream Maker"!!!

I offer the above examples of how Comcast continually has given back to the community, especially to our special players, their families and our volunteers. The Board of Trustees of South Jersey Field of Dreams truly believes we have entered a lasting partnership that will continue support our mission as it joins with NBC Universal.

Respectfully Submitted,

  
Barry Hackett  
Chairman of the Board  
South Jersey Field of Dreams
